

VCI BOW SHIELD

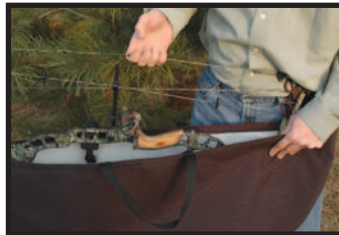

Hard case
not included

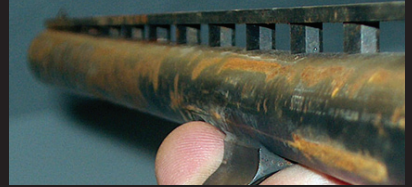

PRODUCT BENEFITS:

- Superior protection from rust & corrosion
- Leaves NO SCENT RESIDUE
- Advanced Vapor Technology
- Use alone or in hard shell cases

The Inhibitor VCI Bow Shield is the only complete solution for protecting your bow from rust and corrosion during transportation and storage. The durable Cordura outer shell protects the bow from wear and tear. The soft 7 mil Poly lining is impregnated with The ADVANCED VAPOR TECHNOLOGY which blends with moisture, physically preventing corrosion on all metal parts for up to 2 years. Scent conscious archers love that The Inhibitor VCI Bow Shield leaves NO OILY FILM, and NO SCENT RESIDUE. The double stitched Cordura handles allow The VCI Bow Shield to be used as carrying case, or easily slipped into a hard travel case. The vapors are proven safe on all wood and synthetic surfaces, and will not harm painted or camo finishes. The Large VCI Bow Shield fits bows with 38" overall length. The X-Large VCI Bow Shield fits bows with 42" overall length.

With The Inhibitor

How The Inhibitor Works

Moisture Oxygen Inhibitor's Invisible Barrier

The chemical compound used in The Inhibitor System is called VCI (Volatile Corrosion Inhibitor). The VCI slowly vaporizes into an enclosed area, placing an invisible barrier over a wide variety of metal surfaces. These vapors are capable of penetrating into the smallest cracks and crevices, blending with hydrogen and oxygen (moisture), rendering them incapable of starting the corrosion process. The Inhibitor's VCI has a proven track record of protecting the entire spectrum of both ferrous and non-ferrous metals such as Iron, Brass, Steel, Bronze, Aluminum and many others.
