

V80 VCI WIPING CLOTH

Without The Inhibitor

With The Inhibitor

How The Inhibitor Works

■ Moisture ■ Oxygen ■ Inhibitor's Invisible Barrier

The chemical compound used in The Inhibitor System is called VCI (Volatile Corrosion Inhibitor). The VCI slowly vaporizes into an enclosed area, placing an invisible barrier over a wide variety of metal surfaces. These vapors are capable of penetrating into the smallest cracks and crevices, blending with hydrogen and oxygen (moisture), rendering them incapable of starting the corrosion process. The Inhibitor's VCI has a proven track record of protecting the entire spectrum of both ferrous and non-ferrous metals such as Iron, Brass, Steel, Bronze, Aluminum and many others.

PRODUCT BENEFITS:

- Cleans, protects and lubricates
- Advanced Vapor Technology
- Safe on all metal surfaces
- Penetrates into the smallest cracks & crevices
- Will not gum up

The Inhibitor VCI Wiping Cloth is perfectly oriented for applying The Inhibitor V80 VCI/Oil Blend to any metal surface. The soft, high-grade Canton flannel wiping cloth measures 10" x 10", and is designed to hold The Inhibitor's V80 VCI/Oil Blend and its corrosion preventing vapors. The Inhibitor V80 VCI/Oil Blend is the most scientifically advanced formula for protecting and lubricating metal surfaces and equipment from rust and corrosion.

The advanced vapor technology is able to penetrate into the smallest cracks and crevices, stopping rust and corrosion in its tracks. The V80 formula is designed for long term protection and should be the last application prior to storing and metal gear or equipment.

V80 VCI WIPING CLOTH

DIRECTIONS FOR USE:

Package contains The Inhibitor V80 Wiping Cloth and one sealed packet of Inhibitor V80 VCI/OIL Blend. Tear open packet and saturate the cloth with contents. Then simply wipe down all your firearms, knives, tools, fishing reels or metal surfaces for long term protection. Store wiping cloth in sealed package when not in use.

Replenish the cloth after moderate use with The Inhibitor's VCI V80 Oil Blend. And for the ultimate in cleaning, use The Inhibitor's Cleaner/Degreaser.
